ROHITH DHARSHAN H

Automation & Production Engineer | Linux (RHEL) | Bash | AWS
rohithdharshan05@gmail.com • Bengaluru, Karnataka • linkedin.com/in/rohith-dharshan8 • github.com/Rohz08

PROFESSIONAL SUMMARY

Engineer with 2+ years of experience, including an internship, building and running automation and operational tooling on Linux (RHEL) for high-availability FinTech trading platforms. Hands-on with Bash, AWS (S3, CLI), monitoring, backup and failover, and live incident support across Production, UAT, Backup, and Disaster Recovery environments. Focused on automating manual steps to prevent human-error incidents. Fast learner, calm under pressure, and clear communicator.

WORK EXPERIENCE

Application Support Specialist | OmneNEST Technologies Pvt Ltd | Jul 2024 – Present
Bengaluru, Karnataka • NEST Trading Platform • Focus: automation and production engineering

- Designed, developed, and deployed **10+ production Bash automation scripts** across UAT, Production, Backup, and DR environments, covering log archival, S3 backups, monitoring, and data extraction.
- Built an automated **S3 backup pipeline** using the AWS CLI, running live in Production and UAT and removing a manual after-market-hours upload.
- Built a **feed health check** run before market open. It replaced manual checking, shows instantly whether data is coming in, speeds up diagnosis, and saves roughly 20–35 minutes each morning.
- Built an automated **file validation check** that replaced a daily manual check, with date rules that vary by day of the week, saving roughly 20–35 minutes each morning.
- Managed the log lifecycle for 6 script types with compression, configurable retention, and dual logging with color-coded status for rapid diagnostics.
- Prioritised removing error-prone manual steps from daily operations through automation, to prevent incidents caused by manual mistakes.
- Handled live production incidents, including switching to backup infrastructure during a primary server outage while keeping management updated, and delivered clear Root Cause Analysis (RCA) reports to clients.
- Kept stakeholders informed with consistent status updates during incidents, tracked tickets in Salesforce, and collaborated with product stakeholders to prioritize and plan automation projects.

Intern | OmneNEST Technologies Pvt Ltd | Apr 2024 – Jul 2024

TECHNICAL SKILLS

Scripting: Bash (functions, arrays, error handling, strict mode), Python (basic)
Cloud: AWS CLI: S3 operations, named profiles, archival pipelines; AWS Cloud Foundations (course)
Operating Systems: Linux (RHEL), Unix: process management, cron, file system operations
Monitoring: Log analysis, feed validation, process health checks, pre-market checks
Networking: TCP/IP, DNS, multicast, network configuration; CCNA modules 1–3
Environments: Production, UAT, Backup, Disaster Recovery
Languages: English (professional), Tamil (native), Telugu and Hindi (conversational)

EDUCATION

Bachelor of Computer Applications (BCA), Mysore University (Distance) | 2025 – Present (alongside full-time work)
Diploma, Computer Engineering & IT Infrastructure, NTTF (Nettur Technical Training Foundation) | 2021 – 2024

CERTIFICATIONS & TRAINING

- **AWS Cloud Foundations**, Amazon Web Services, Jan 2024
- **CCNA Modules 1, 2 & 3**, Cisco Networking Academy, Aug 2023
- AI Fluency: Framework & Foundations, Anthropic, Apr 2026
- Cyber Security Job Simulation, Deloitte (via Forage), Aug 2025
- Masterclass: Ground Control Station Operations, ITCA, Feb 2024

ACHIEVEMENTS

3rd Prize, Pan India CanSat & Drone Applications Competition (Team Lead) | May 2024
Dayananda Sagar University, organised by CSST & Dept. of Aerospace Engineering. Led a team in a two-day national-level competition; wrote the core code and tuned sensor sensitivity through repeated testing.
